HYDRAULIC ROTARY RIG

A new model

After the success of the R-312 HD Soilmec introduces the new model R-312/200 performing:

- **bored piles with dry drilling or bentonite mud**
- **continuous flight auger piles (CFA)**

The main features of the R-312/200 are the following:

- new powerful rotary
- high speed drilling
- easy transport: it can be transported with rotary and kelly bar installed
- compliance with the machine laws for safety standards
- total reduction of rig up time, about 20 minutes from arrival to the job site
- easy to use and handle
- low operating costs
- wide range of accessories (depthmeter, inclinometer, air conditioning, free fall winch)
